

“Gamefowls need **MINERALS** Not only **VITAMINS**”

Gamefowls with **SECRET WEAPON** Ionic Minerals (means minerals do not need to be broken down and are more easily absorbed) as part of their diets benefit in the following important areas:

- Contributes to reduced **MORTALITY** rates during first two weeks of life
- Contributes to increase in overall **BODYWEIGHT**
- Supports **FERTILITY** rates during breeding
- Contributes to increased **STAMINA** and **ENDURANCE** especially on day of fight
- Aids to increase **MUSCLE** tone for hardier muscles
- Supports regular **HEART** rhythm and promote normal **BLOOD CIRCULATION**
- Contributes to **SPERMATOGENESIS** (process of sperm cell formation and development) important during breeding
- Contributes to proper chick **GROWTH RATE**
- Contributes to **IMMUNE** response for higher resistance to diseases (bacteria, viruses, and fungi)
- Allows all nutrients such as **VITAMINS, PROTEINS, ENZYMES, AMINO ACIDS, CARBOHYDRATES, FATS**, etc. to function properly
- Aids **CIRCULATION** to deliver oxygen flow to all tissues especially for stronger lungs
- Aids the immune response process to neutralize **TOXINS** at the cellular level
- Allows Vitamin E to perform its **ANTIOXIDANT** functions
- Supports **BLOOD CLOT** formation
- Allows red blood cells to carry oxygen efficiently for proper blood circulation in different body systems
- Supports **BONE GROWTH** and strength important during hardening and cording
- Aids in development of **TENDONS** and **LIGAMENTS** which help in strengthening and stabilizing joints, permitting movement in certain directions
- Contributes to healthy **JOINT METABOLISM** to facilitate balanced movement that causes no damage
- Allows pituitary gland to **RELEASE** necessary **HORMONES** (like **LUTEINIZING HORMONE** which regulates **TESTOSTERONE** in broodcock and **ESTROGEN** in broodhen which are essential and important during breeding).
- Integral catalyst of **ENZYMATIC** and **HORMONAL** functions for proper production

“Gamefowls need

at least 14 mineral elements”

MINERALS... your Gamecock's **SECRET WEAPON**

| SISTEMA | MINERAL | IMPORTANSYA |
|---|---|---|
| Skeletal (Bone) System (Buto) | Calcium Phosphorous Magnesium Manganese Boron | For stronger bones. <i>Para sa matibay na buto.</i> |
| Muscular System (Masel) | Magnesium Selenium | For hardier muscles to prevent short cutting. <i>Para sa malakas na laman upang maiwasan ang "short cutting"</i> |
| Heart and Circulatory System. (Puso at Dugo) | Iron Copper Cobalt | For stronger heart and promote normal blood circulation. <i>Para sa malakas na puso at normal na produksyon ng dugo.</i> |
| Immune System | Selenium Zinc | High resistance in diseases. <i>Para sa malakas na resistensiya laban sa sakit</i> |
| Respiratory System (Lungs / Baga) | Iron Copper | For stronger lungs for proper oxygen circulation. <i>Para sa malakas na baga upang maging maganda ang daloy ng oxygen sa iba't-ibang parte ng katawan.</i> |
| Integumentary System and Nervous System (Feather and Skin) | Calcium Potassium Iodine | Sharper senses and faster response to nerve impulses. <i>Para sa matalas na pakiramdam at mabilis na "nerve impulse"</i> |
| Digestive System (Panunaw) | Magnesium Manganese Chloride | Enhanced food digestion and nutrient absorption. <i>Para sa mabilis na panunaw.</i> |
| Excretory System (Kidney / Bato) | Potassium Sodium | For normal fluid filtration to promote electrolyte balance in the body. <i>Para sa normal na pagsasala ng mga likido ng mga bato o kidney at paglalabas ng mga dumi upang maging balanse ang mga "electrolytes" sa katawan.</i> |
| Reproductive System (Fertility / Pangangitlog) | Manganese | Increased fertility. <i>Para sa mataas na "fertility".</i> |

How should **Secret Weapon** be given?

(Pamamaraan ng pagbigay)

| Direct Oral - give after feeding (per head) | Feeds -mix w/ concentrate or feeds (per head) | Water (dose per day) |
|---|---|-------------------------|
| | | |

For Direct Oral Instructions:

1. Carefully open the mouth (Maingat na buksan ang bibig ng manok)

2. Squeeze **Secret Weapon** tube bottle to extract liquid beside the tongue. (Ipatak ang **SECRET WEAPON** sa gilid ng dila ng manok)

NOTE: The head should not be raised too much. (Huwag masyadong itingala o itaas ang ulo upang maiwasan ang bluish facial discoloration ng manok or "Cyanosis")

Where to use **Secret Weapon**

(Saan maaaring gamitin ang **Secret Weapon**)

| STAGES | Direct Oral | Feeds | Water |
|--|--|---|---|
| MOLTING | NA (Not Applicable) | 3 drops in the morning and 3 drops in the afternoon mixed in feeds throughout the molting period | 2ml/liter (40 drops) of water at least 4 days in a week throughout the moulting period. |
| BREEDING (mating) For broodstocks throughout breeding season | 3 drops in the morning and 3 drops in the afternoon given after feeding throughout the breeding period | 3 drops in the morning and 3 drops in the afternoon mixed in feeds throughout the breeding period | 2ml/liter (40 drops) of water at least 3 days in a week |
| BROODING Day old to 2 months | NA (Not Applicable) | NA (Not Applicable) | 0.5 ml/liter (10 drops) of water for 2-3 days weekly |
| RANGING 2-5 months old | | | 1 ml/liter (20 drops) of water for 2-3 days weekly |
| HARDENING 5-6 months old | 3 drops in a day given after feeding throughout | 3 drops in a day mixed in feeds throughout | 1 ml/liter (20 drops) of water for 2-3 days weekly |
| CORDING/ MAINTENANCE | | | 1.5 ml/liter (30 drops) of water for 2-3 days weekly |
| CONDITIONING | 3 drops in the morning and 3 drops in the afternoon given after feeding for 2-3 days | 3 drops in the morning and 3 drops in the afternoon mixed in feeds for 2-3 days weekly | 2 ml/liter (40 drops) of water for 2-3 days weekly |
| POINTING | | 3 drops in the morning and 3 drops in the afternoon mixed in feeds 2-3 days before the fight day | 1 ml/liter (20 drops) of water for 2-3 days before the fight |
| DAY OF FIGHT | 3 drops in the morning given after feeding | 3 drops in the morning mix in feeds | Not Applicable (Moisture must be controlled) |
